PROFESSIONAL SUMMARY

Quality Automation Engineer backed by an **M.Sc. in Data Science** from the United Kingdom, offering over 4 years of IT experience in automated testing and manual QA. Proficient in building scalable UI and API automation frameworks, executing cloud data validation on GCP, and leveraging advanced **analytics skills in SQL, Python, and Excel** to verify data integrity and guarantee high-performance enterprise deliverables.

TECHNICAL SKILLS

Languages: Java, Python, SQL, C#, JavaScript, TypeScript, R, Bash, NoSQL

Testing Tools & Frameworks: Quantum (Equifax), Selenium, Playwright, REST Assured, Bruno, Reqnroll, Cucumber, NUnit, JUnit, TestNG, Postman, SOAPUI, Gatling, k6, JMeter, Allure, ExtentReports

Build & CI/CD: Maven, Jenkins, GitHub Actions, Docker, Kubernetes

Cloud & Data: GCP (BigQuery, Dataflow, Cloud Storage, AlloyDB, PubSub, CloudSQL), AVRO, Istio/IdAMS, SSMS, Git/GitHub, Google Secret Manager

AI & Productivity: GitHub Copilot, Gemini CLI, Google AI Studio, Gemini, MS Office (Word, Excel, PowerPoint), Google Workspace (Docs, Sheets, Slides, Vids)

Soft Skills & Business: Stakeholder Communication, Business Analysis, Agile/Scrum, Team Collaboration

Machine Learning: CNN, SVM, Decision Trees, Transformers (BERT), LLMs

EXPERIENCE

Quality Automation Engineer

September 2025 – Present

Equifax

Kerala, India

- Performed UI/API testing, security validation (Istio, IdAMS), and database schema verification using a unified BDD framework (**Java 21, Maven, Playwright, REST Assured**) and **Bruno**; authored 67+ test cases covering token authorization edge cases and database integrity assertions.
- Automated **cloud data extract validation** using **GitHub Actions** CI/CD pipelines, validating AVRO schemas, file names, and bucket naming conventions on **GCP Cloud Storage**.
- Led **UI testing and automation** for a billing/cash management project; built a **.NET 8** suite using **C#, Selenium, and Reqnroll**, validating backend database structures with **SSMS**.
- Utilized **MS Office (Word, Excel, PowerPoint)** and **Google Workspace (Docs, Sheets, Slides, Vids)** to manage test data matrices, draft technical documentation, deliver stakeholder presentations, and create training resources.
- Leveraged **GitHub Copilot, Gemini CLI, and Google AI Studio** daily to accelerate test scripting and prototype Gemini API workflows, combining technical execution with strong business analysis and soft skills to drive team-wide AI enablement.

Test Engineer

July 2019 – December 2022

Infosys Limited

Kerala, India

- Built and scaled a **BDD automation framework** using **Java and Selenium**, automating 60% of manual regression tests and accelerating product release cycles.
- Authored custom **SQL CRUD validation scripts** that improved database query efficiency by 30%, and designed a data utility cutting test setup times by 40%.
- Managed automated execution through **Jenkins CI/CD** and containerised local test suites using **Docker and Kubernetes** to ensure staging environment consistency.
- Conducted API and functional testing cycles using **Postman and SOAPUI**, tracking defects in **Jira and Zephyr** across sprints for 3+ enterprise clients.

PERSONAL PROJECTS

Automation Testing Framework

[Code](#)

Cucumber, Selenium, JUnit, Java, POM, BDD

- Designed a scalable BDD framework using **Selenium, Cucumber, JUnit, and Java** adhering to Page Object Model (POM), reducing test duplication by structuring reusable components across 30+ test scenarios.

Traffic Congestion Mapping

[Code](#)

SQL, QGIS, Python, Spatial Analysis

- Processed and queried 100k+ bus journey records using **SQL and Python** to map Edinburgh traffic congestion patterns in **QGIS**, producing visualisations used to inform urban planning decisions.

EDUCATION

Heriot-Watt University <i>M.Sc. in Data Science (Grade: Distinction)</i>	Edinburgh, United Kingdom <i>January 2023 – July 2024</i>
Kristu Jyoti College Of Management And Technology <i>Bachelors in Computer Applications (Grade: 2:1)</i>	Kottayam, Kerala, India <i>September 2016 – March 2019</i>

CERTIFICATIONS & VIRTUAL INTERNSHIPS

Google Cloud Certified – Generative AI Leader	<i>Professional Certificate Google Cloud November 2025</i>
British Airways Data Science Job Simulation	<i>Virtual Internship Forage July 2024</i>
Career Essentials in Data Analysis	<i>Professional Certificate Microsoft & LinkedIn July 2024</i>
Career Essentials in GitHub	<i>Professional Certificate LinkedIn July 2024</i>

PUBLICATIONS

- Exploring Reproducibility of Human-Labelled Data for Code-Mixed Sentiment Analysis**

AWARDS

- 1st Place – Equifax Internal Hackathon:** Built an AI-powered **Test Data Generation Tool** that reads multiple source documents and automatically extracts structured test data, eliminating 30+ minutes of manual setup per test cycle and significantly reducing human error in data preparation.
- Awarded the **“Insta Award”** for outstanding contributions and leadership in a major Warehouse Management System (WMS) project.
- Contributed to the QMO Team winning **“The Overall Winner of North American Testing Award 2021”** and **“Best Overall Testing Project - Retail”** through high-performance automation and QA execution.
